Knowledge Repository

Geo-Data Interface

Network Infrastructure Management

Custom functionality

Financial Data

Interface to Graphical Data's RESOLVE software

.

Network Infrastructure

Free the value in your data.

Providing data management and analytics via configurable and customisable software.

Targeted at and for the benefit of Middle to Enterprise business operations.

Module Description

Primarily for clients who operate networks which include multiple architectures, platforms and 3rd party telecom infrastructure provision. The ILLUMINATOR software provides the opportunity to unify disparate data sets in a partitioned ITIL based layered model. This can support - Customer, Service, Network, Data, Physical, Location & Supplier information analytics.

Features:

- Discrete Data relationship integration.

- Standardised workspace environment.

- GEO-Data multi-layer data analytic toolkit.

Benefits

Typical applications associated with Network Planning, Capacity Management, Customer

Service Management and OSS/Telemetry platform integration.

Included Data entities:

- Sites

- Network Routing

- Circuit Trails

- TRIBS

- VLANS

- Services

- Contractual data

All data entities are customisable and extensible. Can be used in conjunction with other modules from the existing ILLUMINATOR library, or with customised modules as defined by the client.

Suggested modules suitable for integration: Asset Inventory, Knowledge Repository, Engineering Database.

Anytime, anyplace, anywhere
