Data Visualisations

Free the value in your data.

*Providing data management and analytics via
configurable and customisable software.*

*Targeted at and for the benefit of Middle to Enterprise
business operations.*

Module Description

This ILLUMINATOR module offers a versatile range of data visualisation methodologies and interfaces which allow you to explore your data like never before. Bring your data to life by creating dynamic, responsive and information rich dashboard visualisations.

Make raw data interactive and meaningful through a wealth of exploratory techniques. Answer questions quickly, share with colleagues and nurture business intelligence.

With a vast library of ready to use graphical components your data can be represented in the style you feel is most appropriate. Use the integrated graphical query builder which does not require extensive SQL pre-knowledge to operate.

Features

Range of visualization tools available:

- Node diagrams
- Heat index
- Tree maps
- Interactive bar charts
- Gantt charts and timelines
- Multi line charts
- Tree of life
- Box plots
- Chord diagrams
- Custom developed charts

Benefits

A picture paints 1000 words, so why not let it speak of your data

- Translate raw data into easy to interpret visual charts
- Bring data sets together to identify previously hard to interpret relationships
- Perform visual analysis and fact finding
- Embed live-updated reports on your dashboards, monitoring screens etc

Suggested modules – Asset Inventory, Knowledge Repository, Engineering Database, Custom Modules
