Financial Data

Interface to Graphical Data's
RESOLVE software

Custom Functionality

Free the value in your data.

*Providing data management and analytics via
configurable and customisable software.*

*Targeted at and for the benefit of Middle to Enterprise
business operations.*

Module Description

An ILLUMINATOR module that provides what you 'need'!

While the standard pre-formed modules available can provide a quick start-up option to allow you to reap the benefits of ILLUMINATOR, Graphical Data is not about making your operation fit our software, it's about making your data more accessible and providing you with more actionable information.

All the pre-formed modules can be adjusted and configured following a requirement and specification process but even then, it may not be what you need, or you may need more!

Graphical Data have been doing bespoke software tailoring for a long time, and we are quick and nimble at understanding, interpreting and then adjusting the modules accordingly.

If you have a unique requirement, the Graphical Data software team will work with you to develop a client specific functional module that meets your exact needs. Any new modules specified will be able to integrate seamlessly with any other ILLUMINATOR modules already deployed.

ILLUMINATOR presents the client with an ability to view and manipulate custom datasets in a user-friendly way which 'off the shelf' alternative products will struggle to match.

Benefits:

- Prototypes can be created very quickly in ILLUMINATOR allowing for proof of concept exercises and building business cases
- Data owners can have confidence they are not losing control, but moving to a better, more robust and secure working environment
- Receive the benefits of working in a collaborative software application such as ILLUMINATOR with its tried and tested functionality

Anytime, anyplace, anywhere
