Knowledge Repository

Geo-Data Interface

Network Infrastructure  
Management

Custom functionality

Financial Data

Interface to Graphical Data's  
RESOLVE software

### Financial Data

*Free the value in your data.*

*Providing data management and analytics via  
configurable and customisable software.*

*Targeted at and for the benefit of Middle to Enterprise  
business operations.*

### Module Description

An ILLUMINATOR module which has the ability to associate monetary values with data entities, and equipment.

Either by direct value assignment or by calculated value of multi component parts, the Financial Data module seamlessly integrates with the other ILLUMINATOR modules via a workspace interface to generate reports and dashboard visualisations designed to track and monitor critical KPIs or other financial management information.

### Features include

- Automated stock and stock value reporting

**Anytime, anyplace, anywhere**

## **See what you need, find what you need.**

Represented in tabular, charts or any other available visual format, Graphical Data's Financial data module puts powerful information into easy to interpret forms and displays.

The Financial Data module will provide instant snapshots of momentary situations, however, the data can be stored and accumulated over time, so comparison and chronological change visualisations are also available.

## **Edit and update with ease**
